Colloid Mill

Main application:

This JTM series colloidal mill (butter mill) machine can be applied to mill food, pharmacy, chemical and other industries, it can crush, emulsify, homogeneity and mix, the main technology is up to international standard.

Main structure:

1. Main parts adopt high quality stainless steel, with corrosion resisting and no poison.
2. Main parts stator, rotor adopts specific processing and heating processing technology, with long life and high precision.
3. Stator, rotor and choose different materials, matched with grinding and cutting etc different structure and teeth type for choice, the processing gap can be adjusted and with dial, easy to control and ensure the processing quality.
4. Matched with cooling system to ensure the processing materials' structure.
5. Main shaft and motor separate design and the user can choose different rpm according to demand.

Scope of Application:

Food processing industry: juice, jam, beans, peanuts, cream, beverage, malted milk, egg yolk, ice-cream, etc.
